

DOT MAINTENANCE

OUT-OF-SERVICE CRITERIA

SPEAKERS

John Seidl, Federal Motor Carriers Safety Admin WI
Pam Jones, HNI Risk Services

WHO SHOULD ATTEND

Shop Foreman, Mechanics, and/
or Safety Directors.

COURSE DESCRIPTION

With increased focus on vehicle maintenance by FMCSA through CSA2010 as well as current SafeStat information, it is more important than ever that mechanics are trained properly on out-of-service criteria. Do your mechanics know the North American out-of-service criteria put forth by FMCSA and administered via the Commercial Vehicle Safety Alliance (CVSA) standards during roadside inspections? If not or if they are in need of a refresher, they should attend this workshop for classroom discussion as well as hands-on practical training provided by government and industry experts.

TOPICS COVERED

- CVSA Out-of-Service
- Top Roadside Violations
- Roadside Inspection Process
- OSHA Best Practices for Maintenance Facilities

MATERIALS

One current CVSA laminated spiral bound book will be provided to each company attending. If you already have a CVSA book, please bring it with you.
